

Scan Results Report

Generated on: 2/1/2025 5:34:12 PM

Scanned URL:

http://testphp.vulnweb.com

Detected Vulnerabilities:

sensitive_data_exposure

insecure_deserialization

security_misconfiguration

access_control_issues

csrf

Recommendations:

Detected Vulnerability: sensitive_data_exposure

Remediation: Disable sensitive headers and use secure configurations.

Detected Vulnerability: insecure_deserialization

Remediation: Validate serialized data and use integrity checks.

Detected Vulnerability: security_misconfiguration

Remediation: Add security headers to harden application defenses.

Detected Vulnerability: access_control_issues

Remediation: Implement role-based access control and enforce strict authorization.

Detected Vulnerability: csrf

Remediation: Use CSRF tokens and validate origin headers.
